# SHRI SHIVAJI EDUCATION SOCIETY AMRAVATI'S SCIENCE COLLEGE, CONGRESS NAGAR, NAGPUR UG Department of Biotechnology Add on Course: Nutritional Biochemistry

Session 2022-23 (Session 1)
Course Coordinator Report

A free Add-On Course for UG students in the Department Biotechnology, Shri Shivaji Education Society Amravati's Science College, Congress Nagar, Nagpur was held from 08<sup>th</sup> August 2022 to 08<sup>th</sup> October 2022. The course title was "Nutritional Biochemistry". It is the complete beginner to Expert Course was perfect for anyone who wants to learn Nutritional Biochemistry.

The Nutritional Biochemistry course is designed to explore the biochemical basis of nutrition, focusing on metabolic pathways, nutrient interactions, and their impact on human health. Students will learn about dietary analysis, metabolic disorders, and strategies for nutritional planning.

The course duration was 10 weeks (30 hours). Two theory classes were engaged on Friday & Saturday and one Practical was engaged in every week. The structure of marking system was 50 marks on theory paper and 40 marks on practical examination including 10 marks for internal. The question paper of theory examination was in MCQ type of 25 questions with four multiple choices. Practical examination was also taken on this course for 40 marks. Internal marks assessment was on the basis of regularity, attendance, assignment submission etc. All the 41 students were present in both theory and practical examination. The result was prepared and certificates were also distributed to the students.

Action Taken -Completing a course in Nutritional Biochemistry typically equips a total 83 participants with a deep understanding of the biochemical processes underlying nutrition and metabolism. Students gain insights into how nutrients affect cellular function, metabolic pathways, and overall health. They learn to analyze the biochemical impact of various diets and nutritional interventions, making it possible to develop personalized nutrition plans based on scientific evidence. The course also enhances skills in evaluating and interpreting research related to nutrient metabolism and health outcomes. Ultimately, it prepares individuals to apply biochemical principles to address dietary needs and improve health, whether in clinical settings, research, or public health nutrition

Respected Sir,

This is to request you that, we wish to conduct the add on courses in Microbiology and Biotechnology department these are the certificate courses of thirty hours' time duration.

The details of the courses are submitted here with.

Hence please permit to run the same and oblige me.

Thanking you

# Add on Course for the Session 2022-23 Nutritional Biochemistry

#### Course Introduction

This course explores the biochemical basis of nutrition, focusing on metabolic pathways, nutrient interactions, and their impact on human health. Students will learn about dietary analysis, metabolic disorders, and strategies for nutritional planning.

#### **Course Objectives**

- Develop and Understand the nutritional plans
- To study the effects on metabolic processes
- Learn the nutrition and its impact on human health

Course Title: Nutritional Biochemistry (Session 2022-2023)

Course Co-ordinator: Ms. Mayuri Bhad

#### **Course Introduction:**

This course explores the biochemical basis of nutrition, focusing on metabolic pathways, nutrient interactions, and their impact on human health. Students will learn about dietary analysis, metabolic disorders, and strategies for nutritional planning.

#### **Course Objectives:**

- Develop and Understand the nutritional plans
- To study the effects on metabolic processes
- Learn the nutrition and its impact on human health

Instructional Strategies: Theory class, Practical, Video clips, Models etc.

Evaluation Strategies: Oral discussions and Final MCQ examination

#### **Course Outcomes:**

- 1. Understand the role of biochemistry in nutrition and its impact on human health.
- 2. Analyze dietary patterns and their effects on metabolic processes.
- 3. Identify metabolic disorders and their biochemical basis.
- 4. Develop nutritional plans based on biochemical principles.

Duration of course: Ten weeks (30 Hours)

## Add on Course: Nutritional Biochemistry (Session 2022-23)

### Syllabus of Add on Course: Nutritional Biochemistry

#### **Course Units**

#### Unit 1: Introduction to Nutritional Biochemistry

- Understand the basic concepts of nutritional biochemistry.
- Explore the role of macronutrients and micronutrients in metabolism.
- Discuss the importance of vitamins and minerals in biochemical pathways

### Unit 2: Dietary Analysis and Nutritional Assessment

- Learn methods for dietary analysis and nutritional assessment.
- Interpret nutritional data to evaluate dietary patterns.
- Analyze nutrient intake and its implications on health.

#### Unit 3: Metabolic Disorders and Biochemical Basis

- Identify common metabolic disorders related to nutrition.
- Understand the biochemical mechanisms underlying metabolic disorders.
- Explore therapeutic interventions and nutritional strategies for managing metabolic disorders.

### Unit 4: Nutritional Planning and Biochemical Approaches

- Develop nutritional plans based on biochemical principles.
- Apply biochemical knowledge to optimize nutrient intake and absorption.
- Explore the role of nutraceuticals and functional foods in promoting health.

#### **Practical Sessions:**

#### 1. Dietary Analysis Lab

- Conduct dietary assessments using software tools.
- Analyze nutrient composition and dietary patterns.
- Interpret results to formulate dietary recommendations.

#### 2. Metabolic Disorders Case Studies

- Analyze case studies of metabolic disorders.
- Identify biochemical abnormalities and nutritional interventions.

Develop management plans based on biochemical pathways.

### 3. Nutritional Planning Workshop

- Design personalized nutritional plans based on individual needs.
- Incorporate biochemical insights into meal planning.
- Evaluate the effectiveness of nutritional strategies.

### 4. Nutraceuticals and Functional Foods Demo

- Explore the role of nutraceuticals in health promotion.
- Demonstrate the biochemical actions of functional foods.
- Discuss their potential impact on metabolic pathways.
