

## **Course Coordinator Report**

### **Course Name: Introduction to Android Programming**

A free Add-On Course for UG students in the Department of Computer Science, Shri Shivaji Education Society Amravati's Science College, Congress Nagar, Nagpur, was held from 6 Jan 2023 to 11 March 2023. The course title was "Introduction to Android Programming". This comprehensive beginner to expert course was perfect for anyone who wanted to learn Android programming or enhance their existing skills. Android is the world's most popular mobile operating system, powering millions of devices globally. This course provided the foundation for developing robust and user-friendly Android applications.

In this course, students learned everything about Android Programming, including setting up the development environment, understanding Android architecture, and building simple to complex applications. It was packed full of challenges and exercises to get students writing Android code quickly. The course provided all the necessary tools and knowledge for students to start with Android development. This course was ideal for students interested in the field of mobile app development, providing a solid foundation for creating mobile solutions for various platforms and industries.

At the end of this course, students had the skills and knowledge to develop their own Android applications and were on the path to acquiring more advanced mobile development skills. The course duration was 10 weeks (30 hours). Two theory classes were conducted on Friday and Saturday, and one practical session was held every week. The marking system consisted of 60 marks for the theory paper and 40 marks for practical execution. The theory examination consisted of an MCQ paper with 30 questions, each with four multiple choices. The practical examination was also conducted for 40 marks. All 82 students were present in both the theory and practical examinations. The results were prepared, and certificates were distributed to the students.

Subject: Permission to conduct the add on courses in the Computer  
Science department during the session 2022-2023

Respected Sir,

This is to request you that, we wish to conduct the add on courses in  
Computer Science department these are the certificate courses of thirty  
hours' time duration.

The details of the courses are submitted here with.

Hence please permit to run the same and oblige me.

Thanking you

Yours sincerely

2/07/2022

NAGPUR.  
DEPARTMENT OF COMPUTER SCIENCE

**NOTICE**

Date: 19-December-2022

We are excited to announce the commencement of the Android Programming Certificate Course for all BCA Students free of cost starting from first week of January at Department of Computer science. This course aims to equip you with the skills and knowledge necessary to develop robust and user-friendly applications for the Android platform.

**Course Objectives:**

- Understand the fundamentals of Android development.
- Learn how to design intuitive user interfaces using XML layouts.
- Master activity lifecycle management and event handling.
- Gain proficiency in data storage techniques and networking capabilities.
- Explore advanced topics such as background tasks and Fragments.
- Apply learned concepts through hands-on projects and assignments.
- Course Materials:

Please ensure you have access to a computer with Android Studio installed.

Additional resources and materials will be provided during the course.

**Course Duration:** 10 Weeks (30 Hours)

**Eligibility:** Open to all students of BCA, Shri Shivaji Education Society Amravati's Science College

**Registration:** Interested students can register at the Department of Computer Science office on or before 24-Dec-2022.

**Contact Information:**

For further details, please contact:

## CERTIFICATE COURSE IN ANDROID PROGRAMMING

Free Certificate Course for College Students (BCA)

Session: 2022-23

Duration - 30 Hours (10 Weeks)

Process of Registration- First Come First Served (Limited Seats)

### Course Objectives:

- Understand the fundamentals of Android development
- build layouts using XML and Java
- debugging tools and techniques for troubleshooting Android applications.
- to create innovative and interactive Android applications that meet industry standards.
- Foster problem-solving skills by tackling challenges.

*course provides a comprehensive introduction to developing applications for the Android platform. Through a combination of theoretical lessons and practical exercises, students will learn the fundamentals of Android development, including user interface design, activity lifecycle management, data storage, and interactivity. The course covers essential topics such as building layouts with XML and Java, handling user input, integrating with external APIs, and debugging applications. Students will gain hands-on experience by working on real-world projects, creating their own Android apps from scratch. By the end of the course, participants will have a solid understanding of Android development principles and be equipped with the skills to build and deploy their own Android applications independently.*

COURSE MODULE AND SYLLABUS

Session 2022-2023

**Course Title:** Certificate Course in Android Programming

**Course Coordinator:** Dr. Varsha C. Pande

**Course description:** *This Android programming course provides a comprehensive introduction to developing applications for the Android platform. Through a combination of theoretical lessons and practical exercises, students will learn the fundamentals of Android development, including user interface design, activity lifecycle management, data storage, and interactivity. The course covers essential topics such as building layouts with XML and Java, handling user input, integrating with external APIs, and debugging applications. Students will gain hands-on experience by working on real-world projects, creating their own Android apps from scratch. By the end of the course, participants will have a solid understanding of Android development principles and be equipped with the skills to build and deploy their own Android applications independently.*

**Course Objectives:**

The objective of this Android programming course is to equip participants with the knowledge and skills necessary to develop robust and user-friendly applications for the Android platform. By the end of the course, students will:

- Understand the fundamentals of Android development, including UI design and activity lifecycle management.
- Learn how to build layouts using XML and Java, and handle user input effectively.
- Gain proficiency in data storage techniques and integration with external APIs.
- Develop a strong understanding of debugging tools and techniques for troubleshooting Android applications.
- Acquire hands-on experience through practical exercises and real-world projects.
- Cultivate the ability to create innovative and interactive Android applications that meet industry standards.
- Foster problem-solving skills by tackling challenges commonly encountered in Android development.
- Prepare for further exploration and specialization in advanced Android topics or related fields.
- Gain confidence in independently developing, testing, and deploying Android applications for various purposes and audiences.

**Instructional Strategies:** Theory class, Practical, Video clips.

**Evaluation Strategies:** Oral discussions and Final MCQ examination.

**Course outline:** Course Outlines: (Relevance)

**Module 1: Introduction to Android Development**

- Overview of Android platform
- Setting up development environment
- Introduction to Android Studio IDE
- Creating first Android project
- Understanding project structure

**Module 2: User Interface Design**

- Basics of UI design in Android
- Working with layouts and views
- Designing user interfaces using XML
- Implementing responsive layouts
- Handling different screen sizes and densities

**Module 3: Activity Lifecycle Management**

- Understanding the lifecycle of an Android activity
- Managing activity state transitions
- Implementing lifecycle callbacks
- Handling configuration changes

**Module 4: User Interaction**

- Capturing user input with EditText, Button, and other UI elements
- Responding to user interactions
- Implementing event listeners
- Handling touch events

**Module 5: Data Storage**

- Introduction to data storage options in Android
- Working with SharedPreferences for simple data storage
- Using SQLite databases for structured data storage
- Implementing CRUD operations with SQLite

**Module 6: Networking and Integration**

- Making network requests using HTTP libraries
- Parsing JSON and XML data
- Integrating with external APIs
- Handling network security and permissions

**Module 7: Debugging and Testing**

- Overview of debugging tools in Android Studio
- Debugging techniques for identifying and fixing errors
- Unit testing basics for Android applications
- Testing user interfaces and functionality

**Module 8: Advanced Topics**

- Implementing background tasks with Async Task and other techniques
- Working with Fragments for flexible UI design
- Exploring Material Design principles
- Implementing animations and transitions

### **Module 9: Project Work**

Applying learned concepts to develop real-world Android applications  
Working on individual and group projects  
Applying best practices in design, development, and testing

### **Module 10: Deployment and Distribution**

Generating signed APKs for release  
Publishing apps to the Google Play Store  
App optimization for performance and user experience  
Understanding app distribution channels and strategies

Note: The course outline is subject to adjustment based on the pace of learning and specific needs of the participants.

### **Course Outcomes (COs):**

By completing this course, participants will be able to:

- Develop Android applications from scratch, leveraging the Android Studio IDE and relevant SDKs.  
Design intuitive and visually appealing user interfaces using XML layouts and Android UI components.
- Manage the lifecycle of Android activities effectively, ensuring smooth transitions and efficient resource management.
- Capture and handle user input seamlessly, implementing event listeners and touch event handlers.  
Store and retrieve data using Shared Preferences for simple data storage and SQLite databases for structured data.
- Integrate networking capabilities into Android applications, making network requests and parsing JSON/XML data.
- Debug and test Android applications using built-in tools and techniques, ensuring robustness and reliability.
- Implement advanced features such as background tasks, Fragments, and Material Design principles to enhance application functionality and user experience.
- Apply learned concepts to develop real-world Android applications, demonstrating proficiency in design, development, and testing.
- Deploy Android applications to the Google Play Store, following best practices for optimization, distribution, and user engagement.
- Overall, participants will acquire the skills and knowledge necessary to build high-quality Android applications independently, preparing them for careers in mobile app development or further specialization in Android development.

**Duration of course:** Ten weeks (30 Hours)

**The Structure of Syllabus and System of evaluation -**

Course	Theory Papers and Practical	Total Marks	
		Theory	Practical
Certificate Course in Android Programming	Theory paper- Android Programming * Theory examination will be of MCQ pattern having 30 questions each with equal marks.	60	40
	* Practical examination will be based on folder and performance evaluation in the laboratory	100	

*VCP*

# SYLLABUS

Certificate course (10 weeks)

## Theory

### Unit 1: Introduction to Android Development

Overview of the Android platform, Setting up development environment (Android Studio, SDK installation), Creating first Android project, Understanding project structure and components Basics of UI design with XML layouts, Handling user input and basic event handling.

### Unit 2: Core Concepts and Data Management

Activity lifecycle management, Working with views and view groups, Implementing responsive layouts and handling screen sizes, Data storage options in Android (SharedPreferences, SQLite databases), Integrating networking capabilities (HTTP requests, JSON parsing), Debugging and testing Android applications

### Unit 3: Advanced Topics and Project Work

Implementing background tasks and services, Working with Fragments for flexible UI design, Introduction to Material Design principles, Animations and transitions in Android applications, Project-based learning: Applying learned concepts to develop real-world Android applications, Deployment and distribution of Android applications to the Google Play Store,

**Note:** Each unit will include theoretical lectures, hands-on coding exercises, and project assignments to reinforce learning objectives. The syllabus is subject to adjustment based on the pace of learning and specific needs of the participants.

## PRACTICAL:

### Practical List for Android Programming Course

#### Unit 1: Introduction to Android Development

- Setting up Android Studio and SDK on your computer.
- Creating a basic "Hello World" Android application.
- Exploring the project structure in Android Studio.
- Designing a simple user interface using XML layouts.
- Implementing basic event handling for user interactions.

#### Unit 2: Core Concepts and Data Management

- Managing activity lifecycle: Implementing lifecycle callbacks.
- Creating responsive layouts for various screen sizes and orientations.
- Storing and retrieving data using SharedPreferences.
- Working with SQLite databases to perform CRUD operations.
- Making network requests using HTTP libraries and parsing JSON data.

#### Unit 3: Advanced Topics and Project Work

- Implementing background tasks using AsyncTask or other techniques.
- Designing UIs with Fragments for modularization and flexibility.
- Applying Material Design principles to enhance UI aesthetics and user experience.
- Adding animations and transitions to improve app interactivity.
- Project-based assignments: Developing real-world Android applications, incorporating learned concepts and best practices.
- Deploying and distributing Android applications to the Google Play Store.

Throughout the course, participants will engage in hands-on coding exercises, individual and group projects, and practical assignments to reinforce theoretical concepts and develop practical skills in Android application development.

### Week-wise teaching plan:

Week	Hrs	Syllabus
Week 1	1	Overview of the Android platform
	1	Setting up development environment (Android Studio, SDK installation)
	1	Creating first Android project
Week 2	1	Understanding project structure
	2	Understanding project components Basics of UI design with XML layouts,
Week 3	1	Handling user input
	2	basic event handling.
Week 4	1	Core Concepts and Data Management: Activity lifecycle management
	2	Working with views and view groups
Week 5	1	Implementing responsive layouts and handling screen sizes
	2	Data storage options in Android (Shared Preferences, SQLite databases)
Week 6	1	Integrating networking capabilities (HTTP requests, JSON parsing)
	2	Debugging and testing Android applications
Week 7	1	Advanced Topics and Project Work:
	2	Implementing background tasks and services
Week 8	1	Working with Fragments for flexible UI design,
	2	Introduction to Material Design principles
Week 9	1	Animations and transitions in Android applications
	2	Project-based learning: Applying learned concepts to develop real-world Android applications,
Week 10	1	Deployment and distribution of Android applications to the Google Play Store
	2	Deployment and distribution of Android applications to the Google Play Store

NAGPUR

**Certified Course on Network Security**

Announcement of Theory and Practical Examination Dates for Network Security Certificate Course

**NOTICE**

Date: 11-March-2023

This is to inform all students enrolled in the Certificate Course on Android Programming that the dates for the Theory and Practical Examinations have been scheduled as follows:

**Theory Examination:**

- Date: -17-March-2023
- Time: 04:00 pm
- Venue: Room No B12

**Practical Examination:**

- Date: 18-March-2023
- Time: 04:00 pm
- Venue: BCA Lab, 3<sup>rd</sup> Floor

All students are required to be present at the examination venue at least 15 minutes before the scheduled time. Please ensure you bring your college ID card and any other necessary materials.

For any further queries, please contact the Department of Computer Science office.

**Certificate Course**  
**Examination**

**Course Name: Android Programming**

**Time: 60 Minutes]**

**[Max. Marks: 40**

---

**Practical Exam Slip**

**Unit 1: Introduction to Android Development**

- Setting up Android Studio and SDK on your computer.
- Creating a basic "Hello World" Android application.
- Exploring the project structure in Android Studio.
- Designing a simple user interface using XML layouts.
- Implementing basic event handling for user interactions.

**Unit 2: Core Concepts and Data Management**

- Managing activity lifecycle: Implementing lifecycle callbacks.
- Creating responsive layouts for various screen sizes and orientations.
- Storing and retrieving data using SharedPreferences.
- Working with SQLite databases to perform CRUD operations.
- Making network requests using HTTP libraries and parsing JSON data.

**Unit 3: Advanced Topics and Project Work**

- Implementing background tasks using AsyncTask or other techniques.
- Designing UIs with Fragments for modularization and flexibility.
- Applying Material Design principles to enhance UI aesthetics and user experience.
- Adding animations and transitions to improve app interactivity.
- Project-based assignments: Developing real-world Android applications, incorporating learned concepts and best practices.
- Deploying and distributing Android applications to the Google Play Store.

DEPARTMENT OF COMPUTER SCIENCE

Final Examination

Session 2022-2023

Certificate Course in Android Programming

Maximum Marks: 60

Students Name: \_\_\_\_\_

Roll No: \_\_\_\_\_ Date: \_\_\_\_\_ Time: 1 HOUR

Name and Signature of Invigilator: \_\_\_\_\_

Note: 1. All Questions are compulsory and carry equal marks.  
2. Tick the Correct option only.

1. What is the primary Integrated Development Environment (IDE) used for Android app development?  
a) Eclipse                      b) Visual Studio                      c) Android Studio                      d) IntelliJ IDEA
2. Which file is responsible for defining the structure of the user interface in an Android app?  
a) MainActivity.java                      b) activity\_main.xml  
c) AndroidManifest.xml                      d) strings.xml
3. Which method is called by the Android system when an activity is first created?  
a) onStart()                      b) onCreate()                      c) onResume()                      d) onInit()
4. What is the purpose of SharedPreferences in Android development?  
a) To store and retrieve key-value pairs persistently.                      b) To manage SQLite databases.  
c) To handle network requests.                      d) To implement background tasks.
5. Which layout manager is commonly used to create responsive layouts in Android?  
a) LinearLayout                      b) RelativeLayout                      c) ConstraintLayout                      d) FrameLayout
6. Which class is used to perform CRUD operations on a local SQLite database in Android?  
a) SQLiteOpenHelper                      b) SQLiteDatabase  
c) SQLiteManager                      d) SQLHelper
7. Which HTTP client library is commonly used for making network requests in Android?  
a) OkHttp                      b) Volley                      c) Retrofit                      d) Apache HttpClient
8. Which method is used to add an event listener to a Button in Android?  
a) setOnClickListener()                      b) addOnClickListener()  
c) setOnTouchListener()                      d) addOnTouchListener()
9. Which lifecycle method of an activity is called when the activity is no longer visible to the user?  
a) onStop()                      b) onDestroy()                      c) onPause()                      d) onExit()
10. What is the purpose of the AsyncTask class in Android?  
a) To perform background tasks asynchronously.                      b) To handle user input events.  
c) To manage application resources.                      d) To interact with external APIs.
11. Which XML attribute is used to specify the layout behavior of a view in ConstraintLayout?  
a) android:layout\_width                      b) android:layout\_height

c) app:layout\_constraintStart\_toStartOf      d) app:layout\_constraintTop\_toTopOf

12. Which method is used to inflate a layout resource in an activity?

- a) inflateLayout()      b) setContentView()  
c) createLayout()      d) loadLayout()

13. Which component is responsible for managing the navigation flow between different screens in an Android app?

- a) Activity      b) Fragment      c) Intent      d) Service

14. Which layout manager is best suited for building complex and flexible UIs in Android?

- a) LinearLayout      b) RelativeLayout      c) ConstraintLayout      d) FrameLayout

15. Which attribute is used to specify the orientation of a LinearLayout?

- a) android:orientation      b) android:layout\_width  
c) android:layout\_height      d) android:gravity

16. What is the purpose of the AndroidManifest.xml file?

- a) To define the layout of the user interface.      b) To specify the permissions required by the app.  
c) To manage database operations.      d) To handle background tasks.

17. Which method is called when an AsyncTask is executed?

- a) doInBackground()      b) onPreExecute()      c) onPostExecute()      d) onCancelled()

18. Which class is used to make HTTP GET and POST requests in Android?

- a) HttpURLConnection      b) HttpURLConnection      c) HttpClient      d) HttpsURLConnection

19. What is the primary purpose of using Fragments in Android development?

- a) To manage activity lifecycle callbacks.      b) To handle user input events.  
c) To create modular and reusable UI components.      d) To perform background tasks.

20. Which method is called when a user interacts with a MenuItem in an Android app?

- a) onOptionsItemSelected()      b) onOptionsItemSelected()  
c) onOptionsSelected()      d) onItemSelected()

21. Which layout manager is used to display a list of scrollable items in Android?

- a) RecyclerView      b) GridView      c) ListView      d) ScrollView

22. Which component is responsible for running long-running background tasks independently of the UI?

- a) Activity      b) BroadcastReceiver      c) Service      d) ContentProvider

23. Which method is used to start a new activity in Android?

- a) startActivity()      b) startActivityForResult()      c) startService()      d) broadcastIntent()

24. What is the purpose of the XML file named "strings.xml" in an Android project?

- a) To define the layout of the user interface.      b) To manage localized string resources.  
c) To handle database operations.      d) To specify app permissions.

25. Which method is called when an activity is brought to the foreground after being paused?

- a) onStart()      b) onResume()      c) onRestart()      d) onCreate()

26. Which component is responsible for managing app-wide data storage and retrieval in Android?

- a) Activity      b) Fragment      c) Intent      d) SharedPreferences

27. What is the purpose of the "R.java" file in an Android project?

- a) To store application resources such as layout files and images.

- b) To generate unique IDs for resources defined in XML files.
- c) To handle database operations.
- d) To manage activity lifecycle callbacks.

28. Which method is called to handle the result of a user action initiated by `startActivityForResult()`?

- a) `onActivityResult()`
- b) `onRequestPermissionsResult()`
- c) `onPermissionResult()`
- d) `onResult()`

29. What is the primary purpose of using a `RecyclerView` over a `ListView` in Android?

- a) `RecyclerView` provides better performance and more flexible item layouts.
- b) `ListView` is deprecated and no longer recommended for new development.
- c) `RecyclerView` simplifies data binding and adapter implementation.
- d) `ListView` supports only vertical scrolling, whereas `RecyclerView` supports both vertical and horizontal scrolling.

30. Which method is called when an activity is no longer visible and is about to be destroyed?

- a) `onStop()`
- b) `onDestroy()`
- c) `onPause()`
- d) `onFinish()`

VCP

Assistant Professor  
Department of Computer Science  
S.S.E.S. Am's Science College,  
Congress Nagar, Nagpur

Answers:

- 1) c) Android Studio
- 2) b) activity\_main.xml
- 3) b) onCreate()
- 4) To store and retrieve key-value pairs persistently.
- 5) c) ConstraintLayout
- 6) SQLiteOpenHelper
- 7) OkHttp
- 8) setOnClickListener()
- 9) c) onPause()
- 10) To perform background tasks asynchronously.
- 11) c) app:layout\_constraintStart\_toStartOf
- 12) b) setContentView()
- 13) c) Intent
- 14) c) ConstraintLayout
- 15) android:orientation
- 16) b) To specify the permissions required by the app.
- 17) doInBackground()
- 18) b) HttpURLConnection
- 19) c) To create modular and reusable UI components.
- 20) onOptionsItemSelected()
- 21) RecyclerView
- 22) c) Service
- 23) startActivity()
- 24) b) To manage localized string resources.
- 25) b) onResume()
- 26) d) SharedPreferences
- 27) b) To generate unique IDs for resources defined in XML files.
- 28) a) onActivityResult()
- 29) a) RecyclerView provides better performance and more flexible item layouts.
- 30) b) onDestroy()
