

Shri Shivaji Education Society Amravati's
SCIENCE COLLEGE, CONGRESS NAGAR, NAGPUR
Session 2020 – 2021
Department of Geology

**Online Seminar: "Geology's Impact on Environmental Studies: A
Framework for Research and Entrepreneurship"**

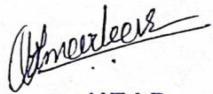

Date: 05th June 2021

Shri Shivaji Education Society Amravati's
Science College, Nagpur
Department of Geology
Organizes online Webinar on the Role of Geology in Environmental Studies

Notice

Date: 05/06/2021

All students of UG are hereby informed that the Department of Geology is organizing an online Webinar on the topic of the "Role of Geology in Environmental Studies". On 5th June 2021 at 12:00 to 01:30 pm. All students are informed to remain present online for the same. Attendance will be taken during the program.

Head HEAD
Department of Geology
S. S. E. S. Amravati's
Science College, Nagpur.

Shri Shivaji Education Society Amravati's

SCIENCE COLLEGE, CONGRESS NAGAR, NAGPUR

Session 2020 – 2021

Department of Geology

Online Seminar: "Geology's Impact on Environmental Studies: A Framework for Research and Entrepreneurship"

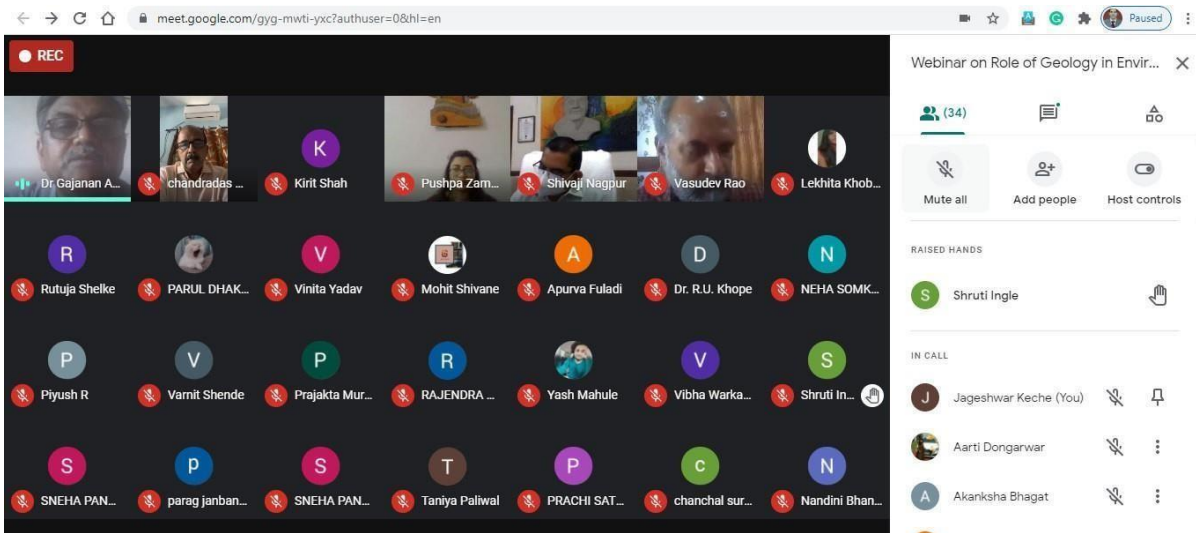

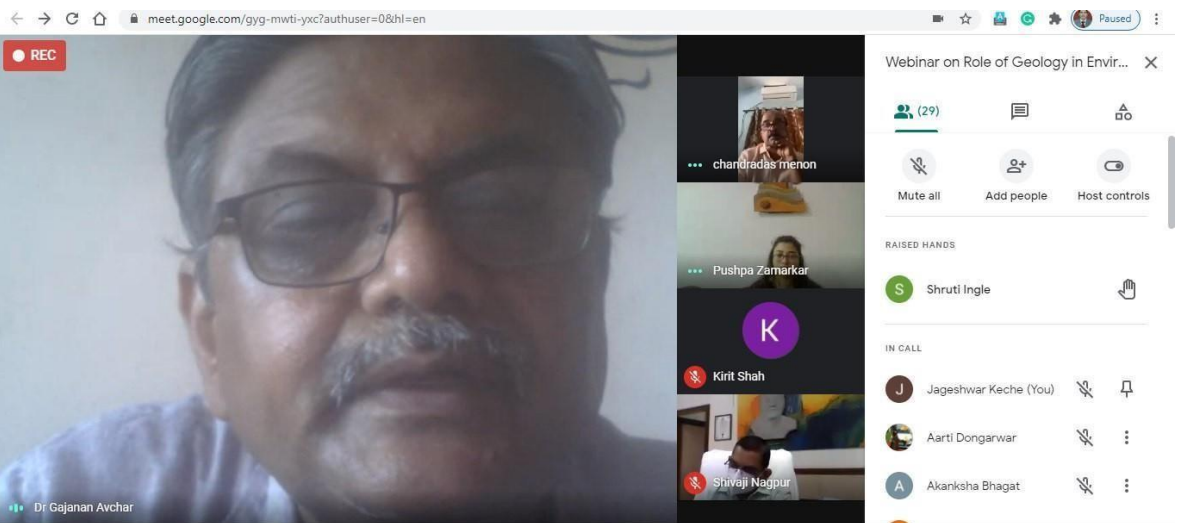

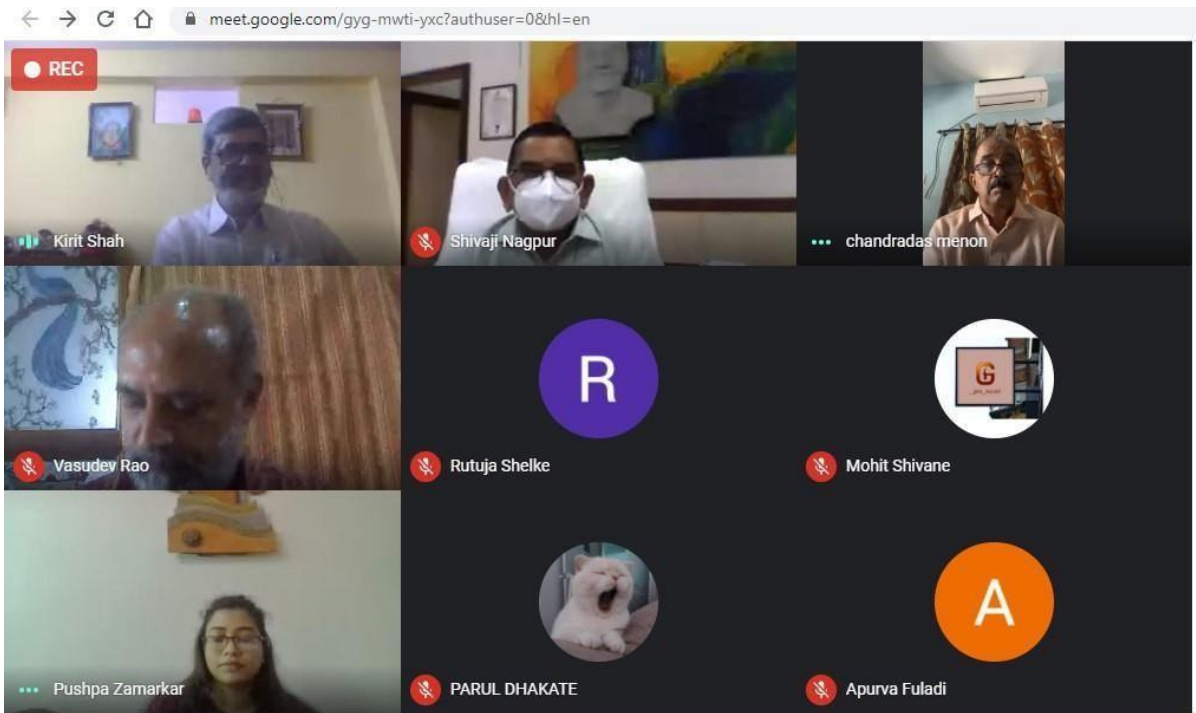

Date: 05th June 2021

No. of Beneficiaries: 60

60 students participated in the seminar. Two guest lecture were arranged. The 1st guest were Dr. Vasudeo Rao and 2nd were Dr. Chandradas Menon. They both explained that Geology plays a crucial role in environmental studies by providing insights into the Earth's history, processes, and materials that shape landscapes and natural resources. It helps in understanding geological hazards, groundwater flow, soil composition, and the distribution of minerals and fossil fuels, which are essential for sustainable development and environmental management. Geologists contribute to environmental studies by assessing the impact of human activities on geological formations and ecosystems, informing policies and practices for conservation, land-use planning, and mitigating environmental risks.

Action Taken: The integration of geology into environmental studies yields a comprehensive understanding of natural processes and human impacts on Earth systems. It enables informed decision-making in resource management, hazard mitigation, and environmental conservation by leveraging geological data and principles. This interdisciplinary approach fosters sustainable practices and policies aimed at preserving ecosystems and mitigating environmental degradation, ensuring a balanced coexistence between human activities and the natural environment.
