**Education Tour Visit to MGIRI, Wardha**

**Date: 04-11-2022**

On November 4th, 2022, students from the Department of Microbiology and Biotechnology, enrolled in a skill-based certificate course, visited the Mahatma Gandhi Institute for Rural Industrialization (MGIRI) in Wardha. The internal assessment for these students was based on their regular attendance as well as their participation in the educational tour at MGIRI. During the visit, students engaged in various skill-based mini projects, which focused on the production of herbal products, the utilization of cotton fiber, yarn production for textile manufacturing, and bamboo crafting. Additionally, they received hands-on training with sophisticated laboratory equipment, enhancing their practical skills in these areas.

**Action Taken-** A total of 67 students visited MGIRI with great enthusiasm, gaining valuable exposure to rural industrialization practices and sustainable production methods, in line with Mahatma Gandhi's vision of self-reliance and eco-friendly industries. They applied theoretical knowledge in real-world settings, gaining insights into rural entrepreneurship, sustainable agriculture, and eco-friendly innovations. The experience emphasized skill development and the role of technology in empowering rural communities. This initiative bridged the gap between classroom learning and practical application, inspiring students to consider careers in rural development and sustainable industries while fostering critical thinking about addressing social challenges through innovation.
