SCIENCE COLLEGE

Congress Nagar, Nagpur-12 (M.S.), India

Accredited with CGPA of 3.51 at 8A+9 grade by NAAC, Bangalore

A <College with Potential for Excellence= identified by UGC New Delhi.

Institutional Member of APQN Recognized

Centre for Higher Learning and Research

Mentor College under 8PARAMARSH Scheme9, UGC, New Delhi

SSES Amravati's Science College, Congress Nagar, Nagpur-12

DEPARTMENT OF PHYSICS

Session 2023-2024

**Course Title: Certificate Course on Physics behind Green
Synthesis of Nanoparticles from Medicinal Leaves**

Duration – 30 Hours (10 Weeks)

Course Start from 1 Aug2023 to7 Oct. 2023

Course Coordinator: Dr. S. V. Khangar

तमसो मा ज्योतिर्गमय

**Shri Shivaji Education Society Amaravati's
Science College Congress Nagar, Nagpur
Department of Physics**

Course Report on Add-on Course

“Certificate Course on Physics behind Green Synthesis of Nanoparticles from Medicinal Leaves”

Undergraduate Course for Physics Students

Duration: 01/08/2023 to 07/10/2023

Total Students: 78

This 10-week add-on course provided B.Sc. Physics students with a comprehensive understanding of the Certificate Course on Physics behind Green Synthesis of Nanoparticles from Medicinal Leaves. The course was conducted by Dr. S. V. Khangar, Assistant Professor, Department of Physics SSES Amt's Science College Congress Nagar Nagpur. Total 78 Students of B.Sc. I, II and III, year Physics were enrolled for the course.

This course provided UG students with a comprehensive understanding of the fundamental physics principles underlying the green synthesis of nanoparticles from medicinal leaves. It also emphasized hands-on experience and real-world applications. This course equipped students with a deep understanding of the physics behind the green synthesis of nanoparticles from medicinal leaves, empowering them to contribute to cutting-edge research and development in nanotechnology with a focus on sustainability and environmental responsibility. The students were evaluated through MCQ based final exam of 60 marks and practical lab sessions and hands on sessions of 40 marks. All 78 students successfully completed the course, with a majority achieving high grades. Several students demonstrated exceptional skills in practical applications and their innovative ideas during hands on experience. Students worked on individual and group projects that involved synthesis and characterization techniques.

The 10-week Certificate Course on Physics behind Green Synthesis of Nanoparticles from Medicinal Leaves was a valuable addition to the undergraduate physics curriculum, equipping students with essential knowledge and skills in synthesis and characterization techniques. The course successfully combined theoretical knowledge with hands-on experiences, the students delve into the quantum mechanics, optics, and thermodynamics involved in the synthesis, characterization, and applications of nanoparticles using green method.

To,
The Principal
SSES Am's Science College,
Congress Nagar, Nagpur-12

Subject: For permission to conduct the add on courses in Physics during the session 2023-2024

Respected Sir,

This is to request you that, the teachers of Physics department have prepared the syllabus and modules of the 30 hours certificate courses for the session 2023-2024.

The details of the course module, syllabus and time table is submitted here with.

Hence please permit to run the add on courses and oblige me.

Thanking you

Yours sincerely

Dr. S. W. Anwane

of Nanoparticles from Medicinal Leaves**

NOTICE (For UG)

Date: 15/07/2023

All the B. Sc. First year, Second Year and Final Year students of the department of Physics are hereby informed that the Physics department commencing a certificate course on "Certificate Course on Physics behind Green Synthesis of Nanoparticles from Medicinal Leaves" from 01/08/2023-07/10/2023. The course registration will start from 20/07/2023 to 31/07/2023. Interested students contact to course coordinator for registration.

Note: It is free registration

DEPARTMENT OF Physics

COURSE MODULE AND SYLLABUS

Course Title: Certificate Course on Physics behind Green Synthesis of Nanoparticles from Medicinal Leaves

Course Coordinator: Dr. Sugandha V. Khangar

Course modules:

1. Introduction to Nanoparticles and Green Synthesis

- Overview of nanoparticles and their significance
- Principles of green synthesis and its importance in sustainability
- Role of physics in guiding green synthesis techniques

2. Quantum Mechanics and Nanoparticle Synthesis

- Basics of quantum mechanics relevant to nanoparticle synthesis
- Quantum confinement effects and size-dependent properties
- Electron transfer processes in green synthesis methods

3. Optical Properties of Nanoparticles

- Plasmon resonance and its role in nanoparticle optical properties
- Quantum dots and their applications in optoelectronics
- Spectroscopic techniques for analyzing nanoparticle optical properties

4. Microscopic Imaging of Nanoparticles

- Principles of transmission electron microscopy (TEM) and scanning electron microscopy (SEM)
- Atomic force microscopy (AFM) for nanoscale imaging and characterization
- Understanding nanoparticle morphology and structure using microscopy

5. Thermodynamics and Nanoparticle Stability

- Thermodynamic aspects of nanoparticle formation and stability

- Gibbs free energy and surface energy considerations
- Strategies for controlling nanoparticle size and stability in green synthesis.

6. Nanoparticle-Biomolecule Interactions

- Physics of nanoparticle interactions with biomolecules
- Drug delivery mechanisms and cellular uptake dynamics
- Applications of nanoparticles in biophysics and medical physics

7. Advanced Characterization Techniques

- Fourier-transform infrared spectroscopy (FTIR) for molecular analysis
- Raman spectroscopy for probing molecular vibrations
- Dynamic light scattering (DLS) for nanoparticle size and zeta potential measurements

8. Applications and Future Perspectives

- Current applications of green-synthesized nanoparticles in physics-related fields
- Emerging trends and future directions in green nanotechnology
- Ethical and sustainability considerations in nanoparticle research and development

Course Objectives:

- 1) Understanding the Quantum Mechanical Basis
- 2) Exploration of Optoelectronic Properties
- 3) Mastery of Spectroscopic Analysis Techniques
- 4) Expertise in Microscopic Imaging
- 5) Investigation of Nanoparticle Dynamics
- 6) Evaluation of Physical Properties

Instructional Strategies: Theory class, Practical, Video clips, Models etc.

Evaluation Strategies: Oral discussions and Final MCQ examination.

Course Outcomes (COs):

1. **Application of Quantum Mechanics:** Apply quantum mechanical principles to predict and explain the optical, electronic, and magnetic properties of nanoparticles synthesized from medicinal leaves, enabling the design of nanomaterials with tailored properties.
2. **Proficiency in Spectroscopic and Microscopic Analysis:** Demonstrate expertise in using spectroscopic and microscopic techniques to characterize the structural and optical properties of nanoparticles, interpreting experimental data through a physics lens.
3. **Skills in Nanoparticle Synthesis and Characterization:** Acquire practical skills in synthesizing nanoparticles using green methods and characterizing them using advanced instrumentation, preparing for research and industrial applications in nanotechnology.
4. **Understanding of Nanoparticle-Biomolecule Interactions:** Gain insights into the physics of nanoparticle-biomolecule interactions, elucidating mechanisms of drug delivery, cellular uptake, and biomolecular sensing for biomedical and biophysical applications.
5. **Critical Thinking and Problem-Solving Abilities:** Develop critical thinking skills and problem-solving abilities by applying physics principles to address interdisciplinary challenges in green nanotechnology, fostering innovation and sustainability.

Duration of course: Ten weeks (30 Hours)

Target Audience:

- Physics undergraduates interested in nanotechnology
- Researchers also seeking to deepen their understanding of green synthesis techniques from a physics perspectives.

Prerequisites:

- Basic knowledge of quantum mechanics and optics
- Familiarity with laboratory techniques (preferred and mandatory)

Certification:

Participants who successfully complete the course requirements, MCQ type theory exam and a practical , will receive a certificate of completion highlighting their understanding of the physics behind green synthesis of nanoparticles from medicinal leaves.

The Structure of Syllabus and system of evaluation -

Course	Theory Papers and Practical	Total Marks	
		Theory	Project/ Practical
Certificate Course on Physics behind Green Synthesis of Nanoparticles from Medicinal Leaves	Theory paper- Physics behind Green Synthesis of Nanoparticles from Medicinal Leaves * Theory examination will be of MCQ pattern having 60 questions each with equal marks.	60	40
	* Practical examination will be based on performance evaluation in the laboratory	100

SYLLABUS

Certificate course (10 weeks)

(Certificate Course on Physics behind Green Synthesis of Nanoparticles from Medicinal Leaves)

Theory-

UNIT- I

Introduction to Nanoparticles and Green Synthesis: Overview of nanoparticles and their significance, Principles of green synthesis and its importance in sustainability, Role of physics in guiding green synthesis techniques.

Quantum Mechanics and Nanoparticle Synthesis: Basics of quantum mechanics relevant to nanoparticle synthesis, Quantum confinement effects and size-dependent properties, Electron transfer processes in green synthesis methods

Unit-II

Optical Properties of Nanoparticles: Plasmon resonance and its role in nanoparticle optical properties, Quantum dots and their applications in optoelectronics, Spectroscopic techniques for analyzing nanoparticle optical properties

Microscopic Imaging of Nanoparticles: Principles of transmission electron microscopy (TEM) and scanning electron microscopy (SEM), Atomic force microscopy (AFM) for nanoscale imaging and characterization, understanding nanoparticle morphology and structure using microscopy.

Unit III

Thermodynamics and Nanoparticle Stability: Thermodynamic aspects of nanoparticle formation and stability, Gibbs free energy and surface energy considerations, Strategies for controlling nanoparticle size and stability in green synthesis.

Nanoparticle-Biomolecule

Interactions: Physics of nanoparticle interactions with biomolecules, Drug delivery mechanisms and cellular uptake dynamics, Applications of nanoparticles in biophysics and medical physics

Unit IV:

Advanced Characterization Techniques: Fourier-transform infrared spectroscopy (FTIR) for molecular analysis, Raman spectroscopy for probing molecular vibrations, Dynamic light scattering (DLS) for nanoparticle size and zeta potential measurements.

Applications and Future Perspectives: Current applications of green-synthesized nanoparticles in physics-related fields, Emerging trends and future directions in green nanotechnology, Ethical and sustainability considerations in nanoparticle research and development.

Practical / Project Work and Assessment

- Hands-on practical work involving the synthesis and characterization of nanoparticles from medicinal leaves.
- Attendance

Distribution of marks: -

- | | |
|------------------------------|------|
| 1. Hands on Practical work - | 30 M |
| 2. Attendance - | 10 M |

Week-wise Teaching Plan

Week	Hrs.	Syllabus
Week 1	3	Overview of nanoparticles and their significance, Principles of green synthesis and its importance in sustainability, Practical
Week 2	3	Role of physics in guiding green synthesis techniques. Basics of quantum mechanics relevant to nanoparticle synthesis, Practical
Week 3	3	Quantum confinement effects and size-dependent properties Electron transfer processes in green synthesis methods practical related to synthesis, Practical
Week 4	3	Plasmon resonance and its role in nanoparticle optical properties, Quantum dots and their applications in optoelectronics, Spectroscopic techniques for analysing nanoparticle optical properties. understanding nanoparticle morphology and structure using microscopy, Practical

Week 5	3	Principles of transmission electron microscopy (TEM) and scanning electron microscopy (SEM), Atomic force microscopy (AFM) for nanoscale imaging and characterization Practical
Week 6	3	Thermodynamic aspects of nanoparticle formation and stability, Gibbs free energy and surface energy considerations, Strategies for controlling nanoparticle size and stability in green synthesis, Practical
Week 7	3	Physics of nanoparticle interactions with biomolecules, Drug delivery mechanisms and cellular uptake dynamics, Applications of nanoparticles in biophysics and medical physics, Practical
Week 8	3	Fourier-transform infrared spectroscopy (FTIR) for molecular analysis, Raman spectroscopy for probing molecular vibrations, Dynamic light scattering (DLS) for nanoparticle size and zeta potential measurements. Practical
Week 9	3	Current applications of green-synthesized nanoparticles in physics-related fields, Emerging trends and future directions in green nanotechnology, Ethical and sustainability considerations in nanoparticle research and development, Practical- Report preparation
Week 10	3	Report Preparation (T) and Submission- Practical

Week 6	3	Thermodynamic aspects of nanoparticle formation and stability, Gibbs free energy and surface energy considerations, Strategies for controlling nanoparticle size and stability in green synthesis, Practical
Week 7	3	Physics of nanoparticle interactions with biomolecules, Drug delivery mechanisms and cellular uptake dynamics, Applications of nanoparticles in biophysics and medical physics, Practical
Week 8	3	Fourier-transform infrared spectroscopy (FTIR) for molecular analysis, Raman spectroscopy for probing molecular vibrations, Dynamic light scattering (DLS) for nanoparticle size and zeta potential measurements. Practical
Week 9	3	Current applications of green-synthesized nanoparticles in physics-related fields, Emerging trends and future directions in green nanotechnology, Ethical and sustainability considerations in nanoparticle research and development, Practical- Report preparation

**Add-on Certificate Course on Physics behind Green Synthesis of Nanoparticles from
Medicinal Leaves**

THEORY EXAM

Date: 18/10/2023

Max. Marks: 60

Max. Time: 1 Hour

Marks Obtained:

Student Name: -----

- Note:** i) All questions are compulsory
ii) Each question carries two marks
iii) Tick the correct option
-

1. What are nanoparticles?
 - A) Particles with a size between 1 to 100 nanometers
 - B) Particles with a size between 1 to 100 micrometers
 - C) Particles with a size between 1 to 100 millimeters
 - D) Particles with a size greater than 100 nanometers
2. Which physical property of nanoparticles makes them suitable for various applications?
 - A) High density
 - B) Large size
 - C) High surface area to volume ratio
 - D) Low reactivity
3. What is the principle behind green synthesis of nanoparticles from medicinal leaves?
 - A) Using harmful chemicals for synthesis

- B) Employing environmentally friendly methods
 - C) Generating toxic waste during synthesis
 - D) Increasing energy consumption during synthesis
4. Which component of medicinal leaves is primarily responsible for nanoparticle synthesis?
- A) Carbohydrates B) Proteins C) Flavonoids D) Lipids
5. How does the surface plasmon resonance phenomenon contribute to the optical properties of nanoparticles?
- A) It decreases the absorption of light
 - B) It increases the scattering of light
 - C) It enhances the absorption and scattering of light
 - D) It has no effect on the optical properties
6. Which physical phenomenon governs the stability of nanoparticles in solution?
- A) Brownian motion
 - B) Electromagnetic induction
 - C) Newton's laws of motion
 - D) Boyle's law
7. What are the potential biomedical applications of nanoparticles synthesized from medicinal leaves?
- A) Drug delivery B) Imaging C) Tissue engineering D) All of the above
8. How do the unique properties of nanoparticles enhance their effectiveness in targeted drug delivery?
- A) They decrease bioavailability
 - B) They increase toxicity
 - C) They improve stability

- D) They enhance specificity and reduce side effects
9. What is the typical size range of nanoparticles?
A) 1-10 millimeters B) 1-100 micrometers C) 1-100 nanometers D) 1-10 centimeters
10. What property of nanoparticles makes them highly reactive in chemical reactions?
A) Large size B) High density C) High surface area to volume ratio D) Low surface area to volume ratio
11. Green synthesis of nanoparticles involves:
A) Using harmful chemicals
B) High energy consumption
C) Environmentally friendly methods
D) Generating toxic waste
12. Which component of medicinal leaves is often responsible for nanoparticle synthesis?
A) Carbohydrates B) Proteins C) Flavonoids D) Lipids
13. What phenomenon is responsible for the color changes observed in nanoparticles due to surface plasmon resonance?
A) Absorption B) Scattering C) Refraction D) Diffraction
14. What physical principle governs the stability of nanoparticles in solution?
A) Boyle's law B) Archimedes' principle C) Brownian motion D) Newton's laws of motion
15. What are the potential biomedical applications of nanoparticles?
A) Drug delivery B) Imaging C) Tissue engineering D) All of the above
16. How do nanoparticles enhance targeted drug delivery?
A) By increasing toxicity
B) By reducing specificity
C) By decreasing stability
D) By enhancing specificity and reducing side effects
17. Which property of nanoparticles is dependent on their size?
A) Density B) Reactivity C) Surface area to volume ratio D) Color
18. Which technique is commonly used to determine the size distribution of nanoparticles?
A) Scanning Electron Microscopy (SEM)
B) Atomic Force Microscopy (AFM)
C) Dynamic Light Scattering (DLS)
D) X-ray Diffraction (XRD)
19. Which technique provides information about the surface properties of nanoparticles?
A) Transmission Electron Microscopy (TEM)
B) Fourier Transform Infrared Spectroscopy (FTIR)
C) Energy Dispersive X-ray Spectroscopy (EDS)
D) X-ray Photoelectron Spectroscopy (XPS)
20. What information can be obtained from a UV-Vis spectroscopy analysis of nanoparticles?

- A) Size distribution
 - B) Elemental composition
 - C) Optical properties
 - D) Surface charge
21. Which technique is used to determine the crystal structure of nanoparticles?
- A) Scanning Electron Microscopy (SEM)
 - B) Atomic Force Microscopy (AFM)
 - C) X-ray Diffraction (XRD)
 - D) Transmission Electron Microscopy (TEM)
22. What is one potential application of nanoparticles characterized by their surface charge?
- A) Drug delivery
 - B) Catalysis
 - C) Imaging
 - D) Tissue engineering
23. How can the information obtained from nanoparticle characterization techniques be used in material science?
- A) To improve manufacturing processes
 - B) To develop new materials with specific properties
 - C) To understand the behavior of materials at the nanoscale
 - D) All of the above
24. What is the primary objective of green synthesis?
- A) Maximizing chemical waste
 - B) Minimizing environmental impact
 - C) Maximizing energy consumption
 - D) Minimizing cost
25. Which of the following is a characteristic of green synthesis methods?
- A) High energy consumption
 - B) Use of toxic solvents
 - C) Generation of hazardous by-products
 - D) Use of renewable resources
26. Which of the following is a common method used in green synthesis?
- A) Microwave irradiation
 - B) Incineration
 - C) Chlorination
 - D) Hydrolysis
27. Which technique is used to monitor the progress of green synthesis reactions in real-time?
- A) Gas chromatography

B) Nuclear magnetic resonance spectroscopy

C) Infrared spectroscopy

D) Ultraviolet-visible spectroscopy

28. What is a significant advantage of green synthesis over conventional synthesis methods?

A) Higher cost B) Lower yield C) Reduced environmental impact D) Longer reaction times

29. Which of the following is NOT a benefit of green synthesis?

A) Reduced waste generation

B) Enhanced energy consumption

C) Safer working conditions

D) Utilization of renewable resources

30. Which industry is particularly interested in green synthesis methods for product development?

A) Automotive B) Textile C) Chemical D) Construction

Accredited with CGPA of 3.51 at 'A+' Grade
A College with Potential for Excellence

CERTIFICATE

Mr./Ku. Sapna J Yadav is awarded with certificate on successful completion of the course entitled, Certificate course in Physics behind Green Synthesis of Nanoparticles from medical leaves.

Session 2023-24 under Add-on course conducted for 30 hours from 01/08/2023 to 07/10/2023 by Department of Physics, SSES's, Science College, congress Nagar, Nagpur 440012.

He/She has passed the Examination with 'A' Grade.
