### 4.3.1 Institution frequently updates its IT facilities and provides sufficient bandwidth for internet connection

The college has a high-speed leased line internet facility of 50 Mbps. The college campus has a 24 x 7 Wi-Fi facility for the student and faculty members to get an internet connection at any place in the college campus and girls' hostel. Connectivity through a fully networked campus with state-of-the-art IT infrastructure, computing, and communication resources provides students with access to e-mail, net surfing, and up/downloading of web-based applications. The college has a Cyberoam firewall to prevent the illegal use of the Internet. Cyberoam network security appliances include a host of features such as Firewall - VPN (SSL VPN & IPsec), Gateway Antivirus, Anti-Spyware & Anti-Spam, Intrusion Prevention System (IPS), Content & Application Filtering, Web Application Firewall, Application Visibility & Control, and bandwidth management. It provides complete visibility into what applications are being accessed within the organization and by which users, regardless of their ports and protocols. It blocks sophisticated application-layer threats right at the network perimeter, thereby ensuring application security. The whole campus is equipped with a CCTV surveillance Facility.
